

Mateus Gomes Barros

Mid-Level Frontend Engineer | React & Next.js | TypeScript | Scalable API Integration | Clean Code | Remote-Ready

mateusgomesbarros2@gmail.com | +55 (98) 99983-6351 | <https://www.linkedin.com/in/mateus-gomes-barros-b90863206/> | Maranhão, Brazil

Summary

Frontend Software Developer with 5 years of experience building scalable SaaS applications using React, TypeScript, JavaScript, and Node.js. Contributed to a platform serving 10,000+ customers worldwide, delivering solutions that supported up to 40% higher sales performance for businesses. Passionate about building high-quality software and solving real-world problems in global engineering teams.

Experience

Front-End Developer

VTurb | Santa Catarina, Brazil (remote)

03/2022 – 05/2026

Developed customer-facing solutions, integrations, and automation workflows for a SaaS platform serving 10,000+ customers worldwide.

- Built scalable applications with React, TypeScript, and Node.js.
- Developed REST API integrations and automation workflows using Make (Integromat).
- Implemented tracking solutions with GTM, GA4, Meta Pixel, Google Ads, and server-side integrations.
- Resolved production issues involving JavaScript, APIs, and third-party integrations to improve application reliability and user experience.

Technologies: React, TypeScript, JavaScript, Node.js, HTML, CSS, REST APIs, Git.

Government-Funded Scholarship Recipient in Full-Stack Development

Inova Maranhão | Maranhão, Brazil (remote)

09/2021 – 01/2022

Selected for a government-funded Full-Stack Software Development program focused on hands-on learning and real-world projects.

- Developed full-stack web applications using modern frontend and backend technologies.
- Built REST APIs, worked with databases, Git, and software architecture fundamentals.
- Applied clean code principles, agile methodologies, and collaborated on end-to-end software projects.

Skills: JavaScript, TypeScript, React, HTML, CSS, Git, Agile Methodologies, Clean Code.

Projects

VTurb Marketing Website

Role: Frontend Developer

- Contributed to the development of VTurb's marketing website for a SaaS platform serving 10,000+ customers worldwide.
- Built scalable and responsive features using React, TypeScript, and Node.js.
- Implemented remarketing tracking, personalized discount flows, and an AI-powered chatbot, contributing to ~10% higher customer retention.

TurbGen – Internal Code Generation Platform

Role: Frontend Developer (Project Owner)

- Designed and developed an internal platform that generated production-ready JavaScript code through a simple form-based interface, eliminating the need for manual coding.
- Built with React, TypeScript, and Tailwind CSS, supporting features such as video delays, fullscreen behavior, forms, and player interactions.
- Adopted by ~200 customers within the first two months, contributing to a ~40% reduction in support complaints related to custom JavaScript implementations.

Minimal Productivity App

Role: Full-Stack Developer

- Designing and developing a minimalist productivity platform focused on habit building, task management, and long-term user engagement.
- Creating a clean, intuitive user experience with modular architecture, API integrations, and continuous improvements based on real-world usage.

Technologies: React, TypeScript, JavaScript, HTML, Tailwind CSS, REST APIs, Git, Responsive Design, Software Architecture, UI/UX, Clean Code, Scalable API Design, Agile.

Education

Computer Science – Descomplica Digital College, Brazil (2022 - 2026)

Computer Engineer – Federal University of Maranhão, Brazil (2021 - 2025)
