SUMMARY

I am a Frontend Software Developer with 5 years of experience building and scaling SaaS applications using React, TypeScript, JavaScript, and Node.js. Contributed to a platform serving 10,000+ customers worldwide, delivering customer-facing products, integrations, automations, and solutions in analytics, tracking, and digital monetization. Experienced in turning real business needs into reliable software, optimizing delivery, and collaborating across remote engineering environments.

EXPERIENCE

Frontend Software Developer

Mar 2022 – May 2026

VTurb | Santa Catarina, Brazil (Remote)

- Developed scalable SaaS applications, customer-facing solutions, and internal tools for a video platform serving 10,000+ customers worldwide.
- Built and maintained 20+ responsive React and TypeScript components and landing-page sections across marketing, sales, and product experiences.
- Integrated REST APIs, Webhooks, and automation workflows using Node.js and Make, and contributed to backend-related integrations involving Java.
- Worked directly with analytics, tracking, and digital monetization via Google Ad Manager (GAM), managing Orders, Line Items, GPT (Google Publisher Tag), Key-Values, creatives, CPM/CTR metrics, analytical reporting, and API integrations.
- Implemented conversion and engagement instrumentation with GTM, GA4, Meta Pixel, and Google Ads, alongside personalized discount and lead-capture flows associated with an estimated ~10% improvement in customer retention.
- Built and maintained capture pages, webinar pages, sales funnels, and conversion-oriented digital experiences, supporting clients with technical and marketing requirements.
- Worked with AWS-backed infrastructure supporting video delivery and scalability, debugging production issues across JavaScript, APIs, and third-party services.
- Served as the technical owner of TurbGen, an internal React/TypeScript code-generation platform adopted by ~200 customers in its first two months, contributing to a ~40% reduction in support complaints related to custom JavaScript implementations.
- Used AI-assisted development tools for debugging, implementation, code analysis, problem-solving, and delivery optimization.

Technologies: React, TypeScript, JavaScript, Next.js, Node.js, Java, HTML, CSS, REST APIs, Webhooks, AWS, Git, Make, Google Ad Manager (GAM - Orders, Line Items, GPT, Key-Values, CPM/CTR), GTM, GA4, Meta Pixel, Google Ads, Analytics, Tracking, AI-assisted development.

Government-Funded Scholarship Recipient in Full-Stack Development

Sep 2021 – Jan 2022

Inova Maranhão | Maranhão, Brazil (Remote - UTC-3/BRT)

- Developed full-stack web applications using modern frontend and backend technologies.
- Built REST APIs, worked with databases, Git, and software architecture fundamentals.
- Applied clean code principles, agile methodologies, and collaborated on end-to-end software projects.

Technologies: JavaScript, TypeScript, React, HTML, CSS, REST APIs, Databases, Git, Agile Methodologies, Clean Code.

PROJECTS

Focus App – Productivity & Analytics Platform

Role: Full-Stack Developer (Project Owner)

- Built and continuously evolved a cross-platform productivity app with Pomodoro sessions, tasks, goals, streaks, time tracking, analytics dashboards, and iOS widgets.
- Implemented an offline-first data flow with local persistence, queued CRUD operations, and Supabase synchronization using TanStack Query and Zustand, with Capacitor and Swift/WidgetKit integrations for iOS.

Technologies: React, TypeScript, Supabase, TanStack Query, Zustand, Capacitor, Swift/WidgetKit, Tailwind CSS, REST APIs, Git, Offline-First Architecture.

MaDev – AI-Powered Developer Growth Platform

Role: Full-Stack Developer

- Building a developer growth platform that tracks knowledge, practice, evidence, and professional readiness through career journeys, skill mastery, checklists, projects, GitHub repositories, certificates, and achievements.
- Integrated AI-powered recommendations, skill-gap analysis, personalized development plans, and job-description analysis across web and mobile experiences.

Technologies: Next.js, React Native, Expo, TypeScript, PostgreSQL, Supabase, OpenAI API, AI.

PROJECTS (CONTINUED)

Reading App – Reading Tracker & Social Sharing

Role: Full-Stack Developer

- Developing a reading tracker focused on low-friction daily use, with book discovery, personal library, reading sessions, progress and streak tracking, goals, statistics, visual reading history, notes, quotes, achievements, and Lock Screen activity.
- Designed high-resolution social sharing for current reads, reviews, quotes, milestones, completed books, and yearly summaries, with a web and mobile architecture backed by REST APIs.

Technologies: Angular, Java, Spring Boot, PostgreSQL, AWS, REST APIs, Web, iOS.

Music Player – Native iOS Music Experience

Role: iOS Developer

- Built a native iOS music player for a 1,000+ song library with offline playback, downloads, favorites, smart filters, search, listening statistics, scrobbling, and immersive artist, album, and Now Playing experiences.
- Designed online-only animated album artwork inspired by Apple Music and Spotify Canvas so animated media does not consume unnecessary local storage while music remains fully available offline.

Technologies: Swift, SwiftUI, iOS, Xcode, Offline Storage.

EDUCATION

- **Computer Science**

Descomplica Digital College (ONLINE), Brazil (2022–2026)

- **Computer Engineering**

Federal University of Maranhão, Brazil (2021–2025)

LANGUAGES

- **English:** B2 (Intermediate)
- **Portuguese:** Native

LICENSES & CERTIFICATIONS

- TypeScript – B7Web Academy, 2022
- React – B7Web Academy, 2022
- Node.js – B7Web Academy, 2022
- Object-Oriented Developer – Descomplica Digital College, 2023
- DB Developer – Descomplica Digital College, 2023
