PROFESSIONAL SUMMARY

Frontend Software Developer with 5 years of experience building and evolving SaaS applications using React, TypeScript, JavaScript, and Node.js. Worked at a platform serving more than 10,000 customers worldwide, developing products, integrations, automations, and solutions for analytics, tracking, and digital monetization. Experienced in turning real business needs into reliable software, optimizing delivery, and collaborating in remote engineering environments.

PROFESSIONAL EXPERIENCE

Frontend Software Developer
Mar 2022 – May 2026

VTurb | Santa Catarina, Brazil (Remote)

- Developed scalable SaaS applications, customer-facing solutions, and internal tools for a video platform serving more than 10,000 customers worldwide.
- Built and maintained 20+ responsive components and landing page sections in React and TypeScript for marketing, sales, and product experiences.
- Integrated and maintained REST APIs, webhooks, and third-party services using Node.js and Make, while also contributing to backend integrations involving Java.
- Worked directly with analytics, tracking, and digital monetization through Google Ad Manager (GAM), managing Orders, Line Items, GPT (Google Publisher Tag), Key-Values, creatives, CPM/CTR metrics, analytics reports, and API integrations.
- Implemented conversion tracking with GTM, GA4, Meta Pixel, and Google Ads, as well as custom discount and lead-capture flows, contributing to an estimated ~10% improvement in customer retention.
- Worked on lead-capture pages, webinar pages, sales funnels, and conversion-oriented digital experiences, supporting customers with technical and marketing needs.
- Worked in an AWS production environment, supporting scalable video delivery and investigating issues involving JavaScript, APIs, and third-party services.
- Was the technical owner of TurbGen, an internal React/TypeScript code-generation platform adopted by ~200 customers in its first two months, contributing to a ~40% reduction in support requests related to custom JavaScript implementations.
- Used AI-assisted development tools for debugging, implementation, code analysis, problem-solving, and delivery optimization.

Technologies: React, TypeScript, JavaScript, Next.js, Node.js, Java, HTML, CSS, REST APIs, Webhooks, AWS, Git, Make, Google Ad Manager (GAM – Orders, Line Items, GPT, Key-Values, CPM/CTR), GTM, GA4, Meta Pixel, Google Ads, Analytics, Tracking, AI-assisted development.

Government-Funded Full-Stack Development Fellow
Sep 2021 – Jan 2022

Inova Maranhão | Maranhão, Brazil (Remote – UTC-3/BRT)

- Developed full-stack web applications using modern frontend and backend technologies.
- Built REST APIs and worked with databases, Git, and software architecture fundamentals.
- Applied Clean Code principles and agile methodologies, collaborating on end-to-end software projects.

Technologies: JavaScript, TypeScript, React, HTML, CSS, REST APIs, Databases, Git, Agile Methodologies, Clean Code.

PROJECTS

Focus App – Productivity & Analytics Platform

Role: Full-Stack Developer (Founder)

- Built and continuously evolved a cross-platform productivity app featuring Pomodoro sessions, tasks, goals, streaks, time tracking, analytics dashboards, and iOS widgets.
- Implemented an offline-first data flow with local persistence, queued CRUD operations, and synchronization with Supabase using TanStack Query and Zustand, along with Capacitor and Swift/WidgetKit integrations for iOS.

Technologies: React, TypeScript, Supabase, TanStack Query, Zustand, Capacitor, Swift/WidgetKit, Tailwind CSS, REST APIs, Git, Offline-First Architecture

Mateus Gomes Barros

PROJECTS & EDUCATION

PROJECTS

MaDev – AI-Powered Developer Growth Platform

Role: Full-Stack Developer

- Building a professional development platform that tracks knowledge, practice, evidence, and technical readiness through career paths, skill mastery, checklists, projects, GitHub repositories, certificates, and achievements.
- Integrated AI-powered recommendations, skill-gap analysis, personalized development plans, and job-description analysis across web and mobile experiences.

Technologies: Next.js, React Native, Expo, TypeScript, PostgreSQL, Supabase, OpenAI API, AI.

Reading App – Reading Tracker & Social Sharing

Role: Full-Stack Developer

- Developing a frictionless daily reading tracker with book discovery, a personal library, reading sessions, progress and streaks, goals, statistics, visual reading history, notes, quotes, achievements, and Lock Screen activity.
- Designed high-resolution sharing features for current reads, ratings, quotes, milestones, completed books, and yearly summaries, supported by a web and mobile architecture using REST APIs.

Technologies: Angular, Java, Spring Boot, PostgreSQL, AWS, REST APIs, Web, iOS.

Music Player – Native iOS Music Experience

Role: iOS Developer

- Built a native iOS music player for a library of 1,000+ songs, with offline playback, downloads, favorites, smart filters, search, listening statistics, scrobbling, and immersive artist, album, and Now Playing experiences.
- Designed online animated album artwork inspired by Apple Music and Spotify Canvas, avoiding unnecessary local storage for animated media while keeping songs fully available offline.

Technologies: Swift, SwiftUI, iOS, Xcode, Offline Storage.

EDUCATION

B.Sc. in Computer Science
Faculdade Descomplica Digital (Online), Brazil (2022–2026)

B.Eng. in Computer Engineering
Federal University of Maranhão, Brazil (2021–2025)

Languages
- English: B2 (Upper-Intermediate)
- Portuguese: Native

Licenses & Certifications
- TypeScript – B7Web Academy, 2022
- React – B7Web Academy, 2022
- Node.js – B7Web Academy, 2022
- Object-Oriented Developer – Faculdade Descomplica Digital, 2023
- Database Developer – Faculdade Descomplica Digital, 2023
